By: Danielle Jakum **from:** Mastic Beach **to:** United States Congress **in:** United States.

Achieving universal healthcare in the United States is an ambitious but essential goal for ensuring equitable access to healthcare services for all citizens. Comprehensive healthcare reform legislation would need to be drafted and enacted, focusing on expanding coverage to include every individual regardless of their socioeconomic status which is where this petition comes into play. My vision is that we could build upon existing programs like Medicare and Medicaid, or implementing a single-payer system to streamline administration and reduce costs. Public education campaigns would also be necessary to inform citizens about their rights and responsibilities under the new system.
